

Obstetrics & Gynaecology - Maternal Fetal Medicine

The Workforce

Obstetricians and Gynaecologists are concerned with separate aspects of women's health care and often managed in the one service. Obstetricians provide medical care before, during and after childbirth. Gynaecologists diagnose, treat and aid in the prevention of female reproductive disorders. The Royal Australian and New Zealand College of Obstetricians and Gynaecologists (RANZCOG) is accredited by the Australian Medical Council (AMC) to deliver obstetrics & gynaecology training.

Workforce Characteristics in 2015

11 Headcount

27.3% Female

49.4 hours

52.5 years average age

72.7% Workforce aged over 50

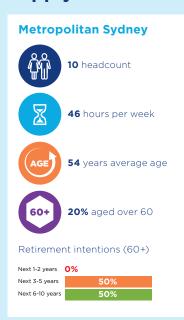

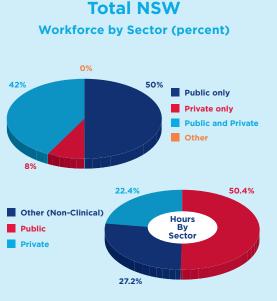

18.2% Workforce aged over 60

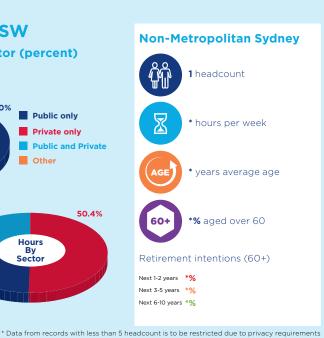

1 New Fellow in Australia in 2016

Supply and Distribution

Trainees

Advanced Trainees in Australia:

2015	2016	2017

The Future in NSW - Workforce Planning to 2030

Workforce projections are provided for a low and high demand scenario. Where requirements for both scenarios are met without the need for additional fellows, the projected "No Growth" scenario workforce data is provided.

Estimated Demand
Growth
Between 1.7%
(low demand scenario)
to 3.1% (high demand
scenario).

Estimated Additional Fellows All demand scenarios require no additional fellows and hence no growth in trainees.

Estimated Workforce
Size
In 2030, 19 Headcount
(assuming all additional
fellows will enter the
workforce).

Estimated Workforce
Average Age
In 2030,
55.1 years.

Estimated percentage
over 60 years
In 2030,
30.6% of workforce
over 60 years.

Workforce Planning Priority and Assessment Framework

Rating Key: Minimal Factor < Minor Factor < Moderate Factor < Major Factor

Workforce Modelling Considerations

- Workforce modelling is based on current models of care. Any change in the models may impact on requirements.
- Any changes to current training programs will affect the workforce modelling outcome.
- Workforce modelling is based on current workforce hours profile by age co-hours. Any changes to hours worked by future clinicians will affect the model.
- There is an accepted error rate of plus or minus two per cent within workforce modelling
- The model does not address any mal-distribution either by location (rural or regional) or sector (public or private)
